holiday in the whole calendar of tom foolery. It is the day when young and old play tricks on one another. Some one says that when a person is fooled on this day in America, as well as in England, he is called an April fool; in Scotland, a gawk, which means a cuckoo; in France, "un poisson d' Avril," which, translated, would be "an April fish"—and this probably explains the origin of the term "sucker," as applied to the person who bites upon a joke nowadays. While there are epithets galore applied to the April ist victim, we believe there is one word that will describe the feeling of all, namely, foolish Remember the date and don't be a gawk.

FOR THE FAIR

The American Girl's Up-to-Date Outing Clothing.

Sweaters—Fashions in Riding Habits
Hats and Neckwear

(Copyright 1904 by Christine Terhune Her-rick)

The American woman has evolved an outing costume that is far ahead of that worn by the women of any other The English woman is devoted to sport but in the joy of this the is so heedless

of her appearance that her dress is us unly a synonym for dowdiness. The Frenchwoman cares comparatively ittle for outdoor sports, but she in dulges in them because one must keep up with the times Usefulness of costume for such occasions she sacri fices to beauty and sets out to play golf and tennis in high heeled shoes and unsuitable garb But the Ameri can girl goes at her outdoor pursuits in a business like manner which makes sensible dress recessary and to this aods a touch of charm that gives her costume a style of its own

There are very few lines of athlet xercise and wholesome sport that are clos d to the girl and woman of today She cannot afford a surt for each one of these and she must generally e m promise on a mething that will saive or all or neady all of them O The main part of the cos' ume is the skirt Time was when a fitted wast had to be made to go with this, but even in horseback riding now it is permissible to wear asi irt waist and the chief at tention can be expended upon the skirt If the girl is rational she will ecor omize in some other ways and go to a

perfection of this will make or mar

Let us consider, in the first place, what kind of sports the girl is likely to follow She will bierele, of course Some other outdoor occupations she might not have the opportunity to at tempt but her wheel as something she can find a chance to use almost any where So the first thing to consider about the surt is how it will answer in bieyeling There was a story going the rounds in the days when outdoor life and roughing for young women were just becoming popular of a girl who went to her dressmaker to give her summer orders and insisted upon having at least one costume that would look well against a rock. The girl of today, when getting up her out

ing garments, must choose a skirt that

vill look well on a wheel Such a skirt is made unlined, of one of the heavy materials that will hang properly, with out the aid of stiffening f any sort. There are several such fabrics Not so many double faced goods are used as there were a season or so ago, but the stuffs are no less attractive The length of the skirt is an important item especially if it is to be used for something besides cycling As a general rule it is cut to come about four inches from the ground The round skirt which was worn a good deal a few years ago has given way to the taven cored skirt with an inverter plait at the back and especial atten tion must be paid to the fit over the hips In fact, the cut of the skir must be most carefully superintended A blunder in this will make the skirt more than another will spoil the whole effect of the garment

nade, will serve for a variety of other uses besides wheeling It can be worn saw and believed For as yet they at golf or at tennis or at basketball knew not the scripture, that He must It is a little short for ordinary street wear, except in very rainy weather, but it is just what one wants for long, rough walks or for boating It is really very little less incommod ing than the bloomers or kn ckerbockers in which the Frenchwomen take their spins in the Bois and far less trouble than the overlong Engish skirts Even the Americans wea their outing skirts longer than they used to do, but they are still short enough to be comfortable on a wheel

or the links or the tennis court With the short skirt is worn the uni ersal shirt waist. The material of this is generally a matter of choice, but for active sports there is nothing better than a light flannel, which permits of best, although the cotton cheviots, which are loose and still thick, an swer almost as well as the flangel With either one of these it is necessar to have some warm outer garment to throw on when one is overheated and for this there is nothing better than

Concerning the sweater one could

say many things and all of them laudtory Gone are the days when it meant an ugly sort of shirt that \* woman could only put on by pulling it over her head, thereby ruining her offure and making it necessary for her to "do" her hair over again. Now the awester goes on like a jacket and the only ugly thing about it is its asme It comes in both light and eavy weights and in all colors. It is knit by hand or made by machine and although the former is the avell-and expensive—thing to have, one is quite as comfortable in a sweater that is the product of machinery The sweater J R Irvine & Co. Druggists of either kind comes with a collar or without, with sleeves or sleeveless The latter form is much less use ful than the former The girl who has a sweater of any kind is in luck Her jacket might be injured by crushing Her sweater she may tie in a hard knot, if she will and it is none the worse, or what is more likely, she can roll it into a tight little bundle, fasten it to the handle bars of her wheel and ride her self into a drenching perspiration with the calm knowledge that when she comes to the end of her run she has a httle friend to keep her from catching cold The sweater may not be very becoming to the over stout figure, but to the slender or medium a ze form it moulds itself most pleasingly and is

good as well as pretty The march of progress in att active ness has not passed by the outing hat. Time was when the only thing to wear for wheeling, for tennis or for anything else of the sort was a sailor hat This was a hard headp ece, that almost always induced a headache sooner or later As it was usually worn the sailor hat failed to shade the eyes and was an uncomfortable thing altogether Some ates, and will not constipate like nearly all other cough medicines. Refuses substitutes, For sale by Ed. D. Hecketman.

hats as a substitute for the sailor, but of late years there have arisen outing hate that are charming as well as casy Soft felts, hamboo and Manila straws that can be bent any way so that they will not take the wind too much in riding a wheel or boating, or fail to protect the eyes in tennis or golf, are BY CHRISTINE T. HERRICK. made in such becoming shapes that almost they persuade the non atbletic girl to p'unge into athletic sports a once Such a hat is an indispensable

part of the outling girl's equipment

Thus far mention has been made of

the dress that would be used in bieycling and in games When one comes to horseback riding there must be mething different Even here common sense has made its way and again the American woman may claim credit for it. No longer need one ride in a stiff fitted waist to match the habit skirt Such waists used to be worn regardless of the temperature and made riding in hot weather a penance more than a pleasure Now the shirtwaist may be worn on the horse as much as on the wheel English women have followed the example of Americans in this respect and the old Synopsis of Rev. Herbert S. Bigebasque waist and the high hat have disappeared together except for state ly occasions. Even in the park smart looking women may be seen riding horseback in shirt waists and soft out ng hats

Also they may be seen wearing di vided skirts and riding astride Not so much in N-w York perhaps as anywhere else although even in New York the new fashion finds adherents But B ston, the conservative, commends riding astride as well as Chicago the radical All over the country the fashon is increasing and with it will come a big clauge in the riding habit Even where the side saddle is still used the skirt is only long enough to cover the feet well and is a great contrast to the old sweeping skirt that almost touched the ground. The divided skirt must be made with great pains and here good tailor in search of the skirt The again the good tailor is an essential the skirt is not right it is likely to her appearance and it is a mistake to be a horror and it is almost better for save here in order to spend somewhere a we man to refrain from riding alto gether than to go in a skirt so poorly made that she both looks and feels up aightly

There is no fear that the taste for athletics is by way of rendering women careless of the daintiness of their ap pearance Because they dress in a clerk for his honesty Moreover, when fashion that makes delicate arrange ments of chiffon and tulls out of place they have not renounced pomps and vanities There are all sorts of neck gear made with especial reference to their ou door occupations and the tailor made girl who goes in for athletics of sorts is as fussy about her stocks and of which seems to show that the aver her collars and her ties as ever was her mother over jabots and lace The girl who rides a wheel or plays golf or much will be forgiven the clever and tennis has offered to her serviceable wash strcke, the Ascot being the favor te as a rule These are made in plain and figured materials, in white or col ors The linea colar, which went en tirely cut of use for a while, is in again bu now it is usually in the form of a little turn over, embroidered or plain With this is worn a silk or ribbon stock All that is demanded of the nackgear is that it should be simple and serviceable as well as becoming The costs of the stock and collars and turnover may be great or small, as the girl's purse permits and her taste inclines But she can look as well in an inexpen sive stock as in the highest priced con

Latest Facts About Bacteria, the Mi-nute Friends of the Farm

Decatur III-At the roundup of the Illinois farmers state institute beld here one of the most important ad dresses given was that of Dr T X Burrill of the University of Illinois in vhich he emphasized the importance of soil bacteria in successful farming and stated the latest facts and ideas in There are bacteria" said Dr Bur

rili that live on bare rocks and get their sustenance from these and from the air and in then life processes ac tually store up organic matter-that is they are soil makers fertility produ cers advance agents in the making of Bacteria put nitrogenous compounds

which are little or not at all utilized by higher vegetation in available shape and so contribute to soil fertil ity in another way ndufication and the bacteria are ni trifying agents It has been found that in this respect there are two groups of these workers One set of species oxidize ammonia or its salts to nitrites and another set further change these nitrates to mitrates A very cu 110us thing is that these bacteria are not able to exect their activities in the horn fowls are the best of feeders, are presence of soluble organic matter—of quiet disposition when properly the very condition most favorable for mated and then eggs are seldom in most other micro organisms Even fertile For these reasons I consider ammonia in a free state is an antisep

tic to the nitrate formers Denitufication can go on in a com pact soil but mimileation requires air It seems that the stimulating effect o illage is very considerably due to this nitrifying activity—that is we cuiti ate soil in part to favor these peculiar bacteriological friends Again these latter cannot work in an acid medium Sometimes the application of lime to certain soils proves to be greatly at vantageous not perhaps because there is too little of this substance for plan food but because it corrects the acid ity and percults among other things the nitrifying bacteria to work Doubt less stable manure operates to some ex tent in the same way and it also fa yors these bacteria after the organic compounds are partially destroyed by assisting in actution. We see too hor tile drainage may indirectly improve the productive capacity of the soil by securing better penetration of air and so again aid our friends the nitifiers Possibly in the full development of agricultural science we shall find more direct methods in securing the volum tary services to their highest efficiency

There is Money In Them if You Can I never have recommended that a farmer should make a specialty of any line of poultry farming but as the tur key seems to think under all climate conditions be it either a warm or cold season and as all farms just teem with insect life, the most natural healthful food a young turkey can have why should not every farmer avail him self of this by doing away with all prejudices and keeping more turkeys? writes C E Matteson in the Milwankee We put the fowls on the farm to take up the waste or scattered grain that is always more or less at tendant around the place Now we should keep turkeys for the

same purpose though instead of taking up their living around the building it should be out on the range compelling them to exist largely from the accumu lations on this range By this practice your crops are better for not having the buss to destroy them and at the same time you have a nice crop of tur keys to sell at Thanksgiving time that has cost you screely anything When I first started my little place

in Pewaukes, I did not intend raising a turkey, for experience had taught me that it needed more than a ten acre plot of land to grow turkeys on but the opportunity was afforded me in this way Nearly a section of land adjoining mine being owned by an old gentleman who not feeling able to farm it himself had rented it piecement until he could tent it no longer owing to its fertility the entire tract a barren plain and yet a splendid place to raise turkeys availed myself of this opportunity Some years I sold as high as \$300 worth of turkeys The past two years have been the

worst I ever experienced in growing turkeys I believe and know that a young turkey it from good, strong par and wet as a chick or a duckling, but the past two seasons were away above the ordinary Instead of thunder storms we had cloudbursts and in con sequence the turkey crop was very short, bringing the market price away up in the twenties so that turkeys were a luxury on the tables last Phanksgiving

But I would not adulse any one to give up raising them just because on or two seasons have been against them The farmer has lad a pretty had time trying to mature a full crop of cern to the past two scusons. List year wa dso very bad on the pot to crop. Wel it does not follow that they are going to quit rusing corn and patitoes

Easter Greeting

Goods for Easter Gowns were never more attractive. Dressmakers will soon be qualifying their promises to make prompt delivery-the work of the eleventh-hour clients will congest just before Easter, and the most they can say will be "I'll do the best I can." Unless you do your part and give your dressmaker reasonable time, that qualified promise will spell disappointment. Is it to be a silk costume? -- and anyhow there'll have to be silk somewhere in making or embellishment. Whatever the need the silk is here. Handsome silk crepe de chines should claim a share of your attention this spring. They were never so fashionable and the colors are lovely. We have twelve different shades of this soft delicate material that clings and drapes to perfection. 24 inches wide, 75c and 85c a yard.

Men's White Shirts Perfect fitting, unlaundered, at 39c Our white shirt service is the best in Bedford, and if the shirt you buy doesn't fit you, you may have your money back.

Vindex Sewing Machines Positive action, double locking, no springs, no vibration, perfect durability, ready adjustment These qualities are most important, and no other machine made equals this on any of these points. Diop head of box top, firshed \$14.98 in carved oak, five drawers. The best low-priced machine on the market.

To Be Rightly Gloved is what most women desire—there is a gen-nine satisfaction in knowing that the hands are properly clothed—and when the cost is reduced to a minimum, every woman has the opportunity to keep the glove box well stocked. I wo-clasped kid gloves in tau, grey and black, 75c. Better grades, including white at \$1, \$1.25 and \$1.50. 45c. Two-clasped silk taffeta in black and colors, at \_\_\_\_\_\_

Ladies' Sweaters Fine for early spring wear. The very best offering of these pretty and very practical garments that we ever made—the best, we think, ever made anywhere. They are all made of fine wools in white and golf red, knitted in a pretty fancy stitch. White at \$1.98

Fine White Goods that every woman wants. White suits every complexion and every style of beauty, it is therefore the most desirable color every season, but the demand this year certainly exceeds that of last year. At 10c a yard, fine quality mercenzed jacquard figured madras. At 12/2c a yd. a variety of choice designs in lace and mercenzed stripe lawns and figured pique. At 25c a yd. figured, mercerized cheviots, many patterns and all good ones

Black English Siciliennes 49c 44 mehes wide. A splendid English black siciliennes at a little price. It is full 44 miches wide and only 49e a His ng purches dethe fine stock of Millinery and yard. The mohair family are members of the most fashionable set this season, too-indeed they were never more sought after indeed they were never more sought after

Crushed Leather Belts They will be worn nearly everywhere this summer and there has been no style in belts in years so effective as these wide, soft leather belts that crush into the lines of the waist. Black and colored 2½ inch leather belts, stitched edge, long makel 25c buckle 25c. 32 meh black patent leather for children's suts ..... Black Petticoats \$1.50 Exceptional value. Black sateen Petricoats, made with full umbiella ruffle, trimmed

with three small hemstitched ruffles, others of black cotton moreen made with full umbrella ruffle, trimmed with small herestitched ruffle another style in sateen, with graduated accordion plaited ruffle, trummed with small tucked ruffle.

New Walking Skirts \$3.75 And you will find them better than ofterings, you will find this the best bargain yet. They are of all-wool cloths in dark and medium shades of grey in broken plaids. Style, seven gore flare with trimming of cloth straps and buttons at the hips, tancy stitched seams and hems. Bed Spreads 98c The continued advance in the piece of cotton makes this announcement an extraordinary one. Every one

who has either a present or future need will readily see the advisability of buying now it means great saving. Full size and heavy crochet bed spreads, Marseilles patterns, hemmed and ready for use- would be good value for \$1.25, now at 98c. Wall Paper We show the largest and best line of papers in Bedford. 25 patterns at 5c and 8c. Gilt papers with 18-inch border at 10c

and 124c. Parlor, hall and dining 100m papers in heavy embossed stripes, tapestry designs—in fact all the leading effects, at 25c, 35c and 40c. Mouldings to match, from 4c to 8c a foot

"B.P.S." Best Paints Sold and we say without doubt the best yarnish, best floor stains, best carriage paint \$1.50 a gallon-no higher in pince than the stuff that chalks off in one or two years time, and six months' sunshine don't make the color- all look alike either.

# Easter Shoes

With the new gown go the new shoes-and the ladies who are particular about their footwear come here for those splendid Reed's shoes, \$2 to \$3 a pair.

We are showing new patterns in carpets almost every daythey are beautiful beyond description—and printer's ink never could portray the tints of the rainbow.
